DWA_04.3 Knowledge Check_DWA4

_____

1. Select three rules from the Airbnb Style Guide that you find **useful** and explain why.

Whitespace usage and Indentation: Using whitespace in your code results in neater-looking and more readable code. Making consistent use of the correct indentation visually represents the order of hierarchy in code in a more readable way.

Iterators: Making use of higher-order functions in JavaScript instead of loops like `for (let)` deals with pure functions that return values to avoid side effects.

Object Destructuring: extract values from objects and assign them to variables more concisely and conveniently. The usage of dot notation makes fetching objects from arrays much easier and more readable.

_____

2. Select three rules from the Airbnb Style Guide that you find **confusing** and explain why.

Multi-line comments: As much as I am familiar with commenting style guides, I'm pretty confused by how multi-line comments follow the same convention as JSDoc comments(using /** … */) otherwise I'm well-seasoned with the knowledge of commenting style guides.

Classes and Constructors: I fail to grasp the context of what classes are in JavaScript, and when, why and how we use them.

Rest and Spread syntax: I am still struggling to distinguish rest syntax from spread syntax.
